A WORD OF WARNING. A WORD OF WARNING.
Our columns contained no Satorday last
two articles side by side, between which at first
sight there is little connection, but which,
nevertheless, bear one upon the other in,
way that does not appear on the surface.
One was headed "Egypt's Mines > a Boom in
London," the other "bord and Lady Cromer,
an interesting sketch." It is to one paragraph
in each article that we wish to call our readers'
statention. Egyptian gold mining has of late
attention. Egyptian gold mining has of late
attention. Egyptian gold mining has of late
attention to the inflancy. we had almost
yet in its inflancy. we had almost atmoted much attention, and it is while it is at yet in its infancy,—we had almost written its second infancy, but that term is significant of dotage rather than a renowal of activity—that decisions must be formed, and steps taken to ensure that in the fature there shall be no trouble in consequence of the overlooking of due presentions in the initial stages of development of the gold mines. In the article to which we refer, and which appeared in the "Finzancier," we find the following:— "There is one point which should not be overlooked just as Egyptians are entering upon a phase of softwirt that will last just as long as the market is maintained in a bealthy condition, and that is the question

upon a passe of society teat win many mass as long as the market is maintained in a beathly condition, and that is the question of labour. This not a burning question, nor happily can it ever be made a party question, as in the case of the Rand. But in these years are not as the case of the Rand. But in these years are seen in the case of the Rand. But in these years are seen in the new farther labour in accessingly sparse, and consequently labourers are few. In the near future labour will have to be imported, but this can be done easily from Iodia, the coolies there finding congenial curroundings in the valley of the Nile. The point does not arise immediately because the mines are only in the development stage, but it will later, and it is as well to realize the fact now instead of ever allowing it to become a market factor, and ultimately a paralysing sating one."

We will pix this into other word, and see how well it fits in with the extract from the other article, which it is not the the attact from the other article, which is many millions are "Our propagity in as true as the sensitive, without clouds of train; many millions without clouds of train; many millions without clouds of train; many millions are waiting to be used. This is the teeting point in the history of Egypt. It wants the iron hand in the valvet gives to beep down the incoming streamers and allow mone homes, the propagity of the sense of the clother, bearing in mind the proceed to read into it the tree significance of the other, bearing in mind which we have a supply and anything to put hold of the allowing millions."

The meaning of this is clear and precise. Let us proceed to read into it the tree significance of the other, bearing in mind which we have a supplied and anything to get hold of the allowing millions."

The meaning of this is clear and precise. Let us proceed to read into it the same admitted to the other which has the proceed to read into it the same admitted to the control of the supplied and the society of the delivery in healthy condition, and that is the question

Lord Oromer oom administered and which bit fair to give Expirian mining it quiettes, in Egryt and the Sodan lies enormous wealth in the way of aneient gold mines and newly-discovered gold areas, to which the wealth of the Rand is as nothing Get your footbald there. Never mind the Egrytain nation to whom the wealth rightly belungs. Scorre the land, and scorre the right to import cheap foreign labour, so that foreign capital may

have for its working machinery a class of labour that will not have any interest other than those of the-people who smploy them. We might add a good deal more the may not be implied by the writer, but would masteer. We might add a good deal more that may not be implied by the writer, butwould meeting not be implied by the writer, butwould meeting notice in the manner of the manner than the authorities to use the utmost vigitance in this matter so as to make it impossible for any future British Agent to sanction such a proceeding. Prevention is better than cure, and forewarned is forearmed. One of the most experienced mining engineers of the day to whom we referred the question—we mean Mr. Alfied—bod ut that the proposal to employ cooks labour was a perfectly practical ore, commercially peaking, whatever it might be politically. We think it our day to make the most emphatic protest in our power against the proposal being even considered possible to be enterlained, either row, five, ten, or twenty years honce, or during the existence of any lease or concession that may be greated.

too most companie protest in our power against the proposal being even considered possible to be sotterismed, either zow, ive ten, or twenty years benes, or during the azisteoso of any lease or concession that may be greated. We have not the alighted wish to discovering the development of the mining industry in Egypt, on the contravy we foresce a great future for it. If, as assume possible, land development may undergo somewhat of a great future for it. If, as assume possible, land development may undergo somewhat of a great future for it. If, as assume possible, land development may undergo somewhat of a great future for it. If, as assume possible, land development may undergo somewhat to may not be a something very fascinating, in the thought of the old working being reopened, and the almost fabolous wealth of anoient times again obtained list ower desires is to see this wealth distributed over as large an area as possible and to prevent its going into the hands of the men who are. "dishonest ready to sacrifice anybody and anything to get hold of the alluring millions." Lord Corner possesses the iron hand in the velvet glove, and, as the "Financies" writer admits, has used it in the past within measurable distance of busy accomplished, and the phenomenal prosperity of the present time only places fresh horders on his shoulders, in place of those of which the smooth currents of late years have in some measure relieved him. We would call upon all to give him more bestyred and generous apport, and if in the true interests only, and coarsies of the well-being of the people, as so many of these prove themselves, we truet that it will never be a regreated velve, we truet that it will never be a regreated server. interests only, and careless of the well-being of the people, as so many of these prove them-selves, we trust that it will never be a represch to the British community resident in Egypt, that at any critical moment that may come, they failed to give his lordship the strong backing he has every right to expect from them.

#### THE EXPANSION OF GAIRO.

THE EXPANSION OF OAIRO.

The petities that has been sent in to the Government by the residents and proprietors of Bonlac-avenne will, it is to be hoped, musel with the attention it deserves, for it is not only a fair artsement of the interests of the petitioners but also of those of the entire community. As we pointed out some little time ago when dealing with the question of hones accommodation in Cairo, one of the residue versions ago of the residue versions are stronger of the fair to the residue versions and the residue versions are stronger of the fair to the residue versions are stronger of the fair to the residue versions are stronger of the fair to the residue versions are stronger of the versions. editire Community. As we position our some bittle time ago when deading with the question of home accommodation in Cura, one of the realty pressing questions of thesis ut the facilitating of the expansion that the city is now undergoing. More and more every day the residents within what were formerly the limits of the town are being pushed cuterative from the centre to make way for the steadily growing need of suppler accommodation for the purely commercial and bininess demands on the available home and building space. The results of the difficulties arising from that present condition of affairs are highly injurious to all the best interests of the town and of the community, and the one real, and indeed community, and the one real, and indeed only, effective runnelly that can be applied in the opening up of the vacant spaces by the community, and the one real, and indeed only, effective runnelly that can be applied in the opening up of the vacant spaces by the community, and the one real, and indeed not be the community and the community. That this may be done it is essential that the Nile may be so bridged that it may cases to be the formidable borrier it now is to the natural growth of the town. The cristing bridge is attituted in perhaps the worst possible set that could be chosen for this purpose, and that upon-which work has already been commenced at, or eather just the product of the pressure upon its residential accommedation. The bridge advocated by the pressure upon its residential accommedation. The bridge advocated by the pressure relevance which were therefore would, however, do infinitely more, and it accompanied by the provision of a transay servise at this point, would muy and the contraction of the pressure upon its residential accommedation.

#### PORT SAID AND AFTER

Anstruther, in the "Westminster G ... Lit cash by one red glowing eye of flame, The low coal barges cluster round the ship. And, through the night, a dark-hued huma:

chain, Coal-laden, chanting, bearrely, noisily, Like black invading demons climb the planks, From barge to ship, and back to barge again, casting their burden in the vessel's hold. Thee, with the dawn, the ship's heart throbe

And, leaving in her wake the busy port, Anne, reward in ner wase une oney port,
She glides into the narrow waterway
That, like a blade of finely-tempered steel,
Pierces the desert's heart, from sea to sea.
On either side the land, and and pale,
Stretches afar, in still monotony;
Unbroken, saw where shadows of the clouds
Lie faintly purple on the barren sand....

#### HAVE YOU THESE SYMPTOMS?

Discaled Kidneys Cause Backache, Urinary Disorders, Gravel, Dizziness, Puffy Piesh, Nervousness, and Irregular Heart's Action.

Kidney disease does not usually come on with starp pain. If it did it would not be so dangerous, because the patient would at once seek treatment and relief.

Ratingy means most so not absolve the work and possible.

On the centrary, most often it comes on quietly—may have been working in the system for years before the patient suspected the real cause of his trouble.

A correspondent recordly wrote to the Predect of the real cause of his trouble.

Service, actiaties, theumatism, a nervous, irritable feeling, or a generally tired feeling, with beart, drapy, etc.
